PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years building scalable SaaS platforms, AI-powered applications, Web3 products, and enterprise backends. Specializes in React/Next.js, NestJS, AWS, and production LLM systems including RAG, AI agents, and workflow automation. Proven track record shipping products used by thousands of users worldwide.

EXPERIENCE

Full Stack & AI Engineer — Freelance / Contract

2024 — Present

- Built Flair AI call evaluation with Deepgram/AssemblyAI transcription and LLM scoring
- Shipped AIOMEGA clinician admin panel and NewsCopilot AI research frontend
- Contributed to Powerhouse legal intake automation and VA Benefits Navigator AI flows
- Delivered Quibbit geo-matching backend and You Waggle share/permissions APIs

Technologies: Next.js, FastAPI, OpenAI, NestJS, PostgreSQL, Atlassian Forge

Senior Full Stack Developer — Product & Platform Engagements

2022 — 2024

- Built InheritedData backend pipelines for exclusive inherited-property lead delivery
- Shipped My Preschool Pro real-time analytics dashboards for school administrators
- Published serverless Confluence/Jira apps on Atlassian Marketplace for kencha Software

Technologies: React, Node.js, NestJS, Python, MongoDB, PostgreSQL

Software Engineer — Product Teams

2021 — 2022

- Delivered e-commerce platforms with Stripe checkout and inventory management
- Built real-time chat with Socket.io and encrypted MongoDB storage
- Implemented REST/GraphQL APIs with authentication and role-based access

Technologies: React, Express, PostgreSQL, Socket.io, Stripe

SELECTED PROJECTS

Flair — AI Call Evaluation & Secret Shopping

Built AI-driven call automation and evaluation that secret-shops leasing teams: speech-to-text transcription via Deepgram/AssemblyAI, LLM analysis of urgency, qualification, and fair-housing signals, plus vector retrieval for consistent scoring.

FastAPI · Python · OpenAI · Deepgram · AssemblyAI · Vector Retrieval
<https://getflair.io/>

Powerhouse — AI Legal Intake Hub

Contributed to an AI intake hub that ingests calls, faxes, and PDFs, OCRs content, extracts parties/dates/exhibits/deadlines, and syncs case-ready data into CMS workflows.

React · Next.js · Python · Node.js · OCR · Document AI · API Integrations
<https://powerhouse.so/>

AIOMEGA — Clinician Admin Panel

Built the full admin panel frontend for AIOMEGA's clinician/partner portal with a streamlined case-intake workflow, clear status tracking, and role-aware UI for partners and clinicians.

React · Next.js · TypeScript · Tailwind CSS · REST APIs
<https://admin.aiomd.com/>

NewsCopilot — AI Research Frontend

Built the frontend for an AI-driven research tool that surfaces relevant public data tied to reporting subjects — with privacy-preserving context and clear data visualizations.

React · Next.js · TypeScript · Data Visualization

TECHNICAL SKILLS

AI Engineering

OpenAI API, Anthropic API, Google Gemini, LangChain, LangGraph, RAG, Vector Databases, Prompt Engineering, AI Agents, MCP Servers, OCR / Document AI, Speech-to-Text, Deepgram, AssemblyAI, LLM Applications, Semantic Search, Embeddings, Function Calling, Streaming Responses, n8n Automation

Frontend

Next.js, React, TypeScript, JavaScript, Tailwind, Material UI, Shadcn UI, Redux, React Query, Zustand, GraphQL, Apollo Client, Data Visualization, Framer Motion, HTML, CSS, SCSS

Backend

Node.js, NestJS, Express, Python, FastAPI, TypeScript, REST APIs, GraphQL, Prisma, TypeORM, Authentication, JWT, OAuth, WebSockets, Socket.IO, Geolocation APIs, BullMQ, Cron Jobs

Databases

PostgreSQL, MongoDB, Redis, MySQL, Supabase, Firebase, Data Pipelines

Cloud & DevOps

AWS, Docker, GitHub Actions, CI/CD, Nginx, Linux, Atlassian Forge, Serverless, DigitalOcean, Cloudflare, Vercel, Netlify

Blockchain

Solidity, Web3.js, Ethers.js, NFT, Launchpads, ERC20, ERC721, Wallet Integration, Smart Contracts

AVAILABILITY

Available for senior engineering roles, contract work, and remote opportunities worldwide. Open to AI, SaaS, cloud, and Web3 product builds.
